

8 Way Thinking

Promotes high order thinking by encouraging students to look at things afresh and make unusual connections.

How it works

Pick an object such as a shoe and on the board write these headings:

Numbers

Words

People

Feelings

Nature

Actions

Sights

Sounds

Students then brainstorm each of these areas as quickly as possible and write down as many connections between 'shoe' and each heading. Groups then feedback their plethora of ideas thoughts and connections to the class.
